---

## EXECUTIVE SUMMARY

Distinguished security engineering leader with 14+ years in Application/Product Security driving remediation at scale, secure-by-default SDLC guardrails, and CI/CD security automation. Experienced mentoring senior engineers, partnering with product/engineering leadership to embed security into planning and OKRs, and translating technical risk into executive-ready business impact.

## HIGHLIGHTS

- Led Application Security technical strategy across a broad product ecosystem; established mandatory security quality gates across product pipelines to shift security left.
- Integrated SAST and SCA automation at scale to aid 10k+ products and tens of thousands of developers; improved signal via triage and variant analysis to focus on systemic fixes.
- Owned OSS/Supply Chain Security components including trustworthiness modeling and third-party vulnerability triage to reduce dependency risk.
- Partnered with engineering leadership for threat modeling and architecture decisions on flagship client and cloud products (e.g., SupportAssist, VxRail), sequencing remediation into delivery plans.
- Mentored 15+ senior engineers; codified secure design patterns and SDL catalog used enterprise-wide.

## CORE COMPETENCIES

- People Leadership & Mentorship (career growth plans, life coach)
- Vulnerability Lifecycle Management (triage, RCA, remediation governance)
- CI/CD Security & Quality Gates (SAST/SCA, pre-merge checks, policy-as-a-code)
- Threat Modeling & Design Reviews (STRIDE, PASTA, DREAD; web, desktop/thick client, cloud, microservices, containers)
- Supply Chain Security (OSS intake, trustworthiness model, risk management)
- Tooling (GitHub Actions; Fortify, Sonar, Checkmarx, Snyk; BlackDuck; Burp/ZAP)
- Standards & Frameworks (NIST SSDF, ISO/IEC 27034, OWASP Top 10)

## **PROFESSIONAL EXPERIENCE**

### **DELL TECHNOLOGIES • Bengaluru, India | 2018 – Present**

Senior Principal Engineer, Product Security

- Technical lead for Application Security across a global portfolio; defined secure development guardrails and mandatory quality gates in CI/CD.
- Integrated SAST/SCA into pipelines (Fortify, Sonar, Checkmarx, Snyk; BlackDuck) and tuned triage to improve signal and reduce remediation friction.
- Drove threat modeling and architecture reviews for flagship client and cloud offerings (e.g., Dell SupportAssist, VxRail); partnered with engineering leaders to plan fixes.
- Managed remediation lifecycle for high-impact issues with root-cause and variant analysis to prevent recurrence; collaborated with incident response on P0/P1 cases.
- Owned OSS & supply-chain security trustworthiness model to evaluate third-party component risk and intake flows.
- Built an enterprise SDL catalog of secure patterns; mentored 15+ senior engineers on secure coding and remediation practices.

### **OPENTEXT INC. • Bengaluru, India | 2017 – 2018**

Principal Product Security Engineer

- Defined security strategy and performed architecture assessments/threat modeling for Content Server (Documentum) as it evolved to multi-tenant/SaaS contexts.
- Established SDL assessment frameworks, including manual security testing and code reviews for enterprise content platforms.

### **EMC CORPORATION • Bengaluru, India | 2014 – 2017**

Associate Principal Engineer, Product Security

- Drove security strategy, architecture assessments, and SDL practices for Documentum; led manual testing and code reviews across web applications.

### **SAMSUNG ELECTRONICS LTD. • Bengaluru, India | 2013 – 2014**

Lead Engineer, R&D Division

- Implemented HDCP and optimized cryptographic operations for high-throughput visual display systems with C/C++.

## **EDUCATION**

- Ph.D., Information Security — IIT Kharagpur (2014)
- PGD, Cyber Law & Cyber Forensics — NLSIU (2025)
- B.Tech, Computer Science & Engineering — IEM Kolkata (2008)

## **CERTIFICATIONS**

- GIAC Defensible Security Architect (GDSA)
- GIAC Information Security Professional (GISP)
- GIAC Machine Learning Engineer (GMLE)
- Certificate of Cloud Security Knowledge (CCSK)
- Certified Ethical Hacker (CEH)

## **THOUGHT LEADERSHIP & RECOGNITION**

- 4 US patents in product security
- 20+ IEEE/ACM papers and multiple journal articles
- Invited Speaker at 100+ national and global security forums.
- Professor of Practice in Cyber Security (REVA University)
- Awards: BusinessWorld Security 40under40 (2024)
- Distinguished Member of Technical Staff, Dell Technologies (2022)

## **KEYWORDS (for ATS)**

OWASP Top 10; SAST; DAST; SCA; Vulnerability Management; RCA; Variant Analysis; MTTR; CI/CD; Quality Gates; Policy Enforcement; GitHub Actions; Jenkins; Fortify; Checkmarx; Sonar; Snyk; BlackDuck; Burp; ZAP; Threat Modeling (STRIDE, PASTA); OSS; Supply Chain Security; SDL; Secure-by-Default; Kubernetes/Microservices.
